

NEW JERSEY
AMERICAN WATER

120 Raider Boulevard
Hillsborough, NJ
08844

www.amwater.com

To our neighbors in Manville-

Starting on or about Monday June 6th 2022, New Jersey American Water will be replacing its aging 10" water main with new 12" water main on Main Street from Dukes Parkway to Brooks Boulevard. . This water main is being replaced prior to an upcoming Somerset County paving project, and is being done to increase reliability, water quality, and flow rates for existing fire hydrants in the area.

CRJ Contracting, a NJAW certified contractor, will be performing this water main installation work for NJAW. Working hours will be 8PM-6AM Monday through Friday. This project is being done at night so as not to affect any businesses along Main Street during the day.

The project will progress in the following stages:

- 1) Installation of new 12" Ductile Iron pipe
- 2) Flushing/water quality sampling
- 3) Installation of new individual service lines for homes/businesses.

Aside from any unforeseen situations, (such as the old pipe leaking) water service to customers on Main Street will not be interrupted during the project, with the exception of the day the new individual water line is run from the street, connecting into the customers existing line at the curb. Residents/businesses will be notified of this prior to this work taking place.

Traffic control will be coordinated through CRJ Contracting & Manville Police. Working hours will be Mon-Fri, 8pm-6am. Resident access in/out will be maintained as much as possible with the help of Manville PD. Access for emergency vehicles will be maintained at all times. Full access to the street will remain in place during non-working hours and on weekends. Trenches will be base paved at the end of each work night. Any sidewalk/grass restoration will be done at the

conclusion of the project. Final paving of the entire street will be completed by Somerset County as part of their upcoming roadway improvement project. NJAW & CRJ Contracting will make every effort to make things as convenient as possible for everyone while the job is progressing. If you have any questions, special requests or special accommodations needed, please do not hesitate to reach out to me.

Again, NJAW thanks you for your patience and understanding as we work to improve your water system in Manville.

Sincerely,

Michael Kellogg
